VI Technology, an Aeroflex Company, Develops Test Systems for Second-Generation of Ford SYNC®

<http://www.aeroflex.com/ats/products/prodfiles/news/02082010a.pdf>

Austin, TX—February 8, 2010— VI Technology MMTS™ for production testing of new and existing components was used in the development of second-generation of Ford's SYNC system. VI Technology MMTS™ is an automated test system designed to improve productivity for design and test engineers needing analog & digital measurements for audio/video devices.

Ford has continued to innovate and add features to SYNC, including adding traffic, directions and information capabilities starting with the 2010 model year.

VI Technology worked closely with the Ford's design team to customize MMTS™ tests tailored specifically for Bluetooth, Wi-Fi, USB, and audio and video features found in SYNC. A key feature of the MMTS is its scalable architecture, which enabled users to easily create or add existing tests. These customized tests and the ability of MMTS™ to test up to eight devices simultaneously were essential to Ford's aggressive 2010 plans.

"The Ford SYNC project is a perfect example of how to leverage the MMTS™," said Alex Backus, vice president of strategic development at Aeroflex. "Ford required fast and accurate automated measurements for a variety of multimedia technologies in

a high volume production environment. The MMTS has been recognized as the best in the industry for consistently addressing these types of challenges.”

In 2009, the MMTS™ was selected as the winner of the *Test and Measurement World's* prestigious Best in Test Award for the Audio/Video and Multimedia Category. The MMTS™ Moving Video Test System is a finalist in the same category for 2010.

For more information about the MMTS™, please visit www.vi-tech.com/mmts or call 1-888-689-4415 to speak with a regional account manager.

About VI Technology

VI Technology, an Aeroflex company, is a leader in enterprise test solutions, test engineering services, and baseband test systems, specializing in audio/video and multimedia such as the MMTS™ (www.vi-tech.com/mmts). In addition to distinguishing ourselves as a leader in audio/video test, we are experts in test software, software development, hardware design, and enterprise technologies such as Arendar® 2009 Suite (www.vi-tech.com/arendar2009suite).

About Aeroflex

Aeroflex Incorporated is a global provider of high technology solutions to the aerospace, defense, cellular and broadband communications markets. The Company's diverse technologies allow it to design, develop, manufacture and market a broad range of test, measurement and microelectronic products. Aeroflex Incorporated was founded in 1937 and today has more than 2,600 employees worldwide. Additional information concerning Aeroflex Incorporated can be found on the company's web site:
